# Mobile App

Bring work on the go — **anytime, anywhere**

The UKG Dimensions™ mobile app (formerly the Kronos® Workforce Dimension mobile app), available in the Apple™ and Android™ app stores, brings instant access to relevant employee information and tools through a user-friendly and intuitive design. Built to help people stay productive, the Dimensions mobile app delivers a delightful, modern work experience for employees and managers at work and on the go.

Engaging Employee Experience

The Dimensions mobile app helps organizations drive adoption and engagement by providing a unique mobile experience for users — designed with simplicity and ease of use in mind. Whether it's accessing employee information, managing time-off requests, or leveraging Dimensions insights, it's all just a few taps away.

Self-Service Made Simple

Give employees more control over their schedule by enabling them to take time off, grab additional hours, and more through self-service. All the self-service capabilities follow your organization's scheduling rules, so you'll always have the right people at the right place at the right time — it's the perfect compromise to empower your people and achieve an optimal schedule.

Quick, Secure Access

Built-in encryption and user authentication log your managers and employees in to the app securely via fingerprint or face unlock within seconds. Data is encrypted while it's stored on your phone and when it's sent between Dimensions and the mobile app, keeping you and your information safe.
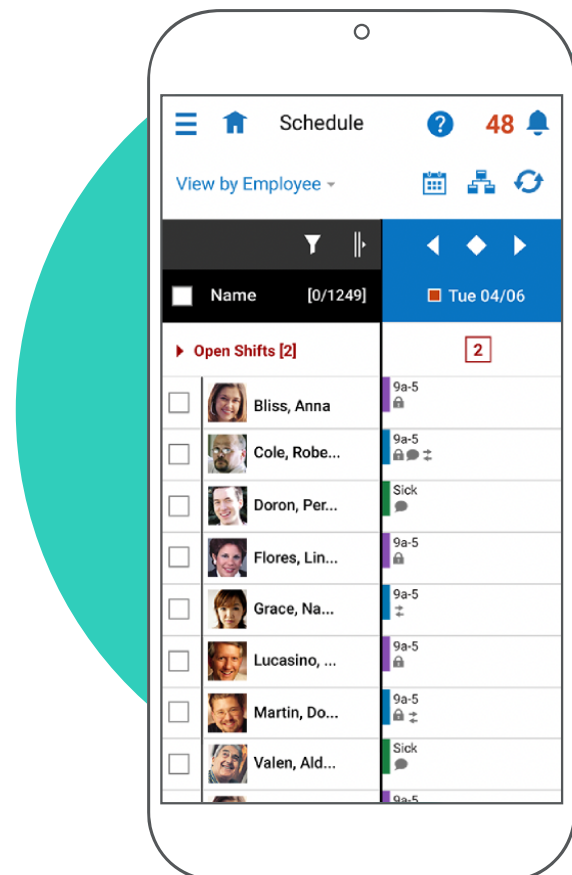

Employee Features

- Punch in and out of shifts, even when offline

- Take action with alerts and Push Notifications with Actions

- View and approve timecards

- Request a shift change or swap shifts with a coworker

- Request and accept open shifts for more hours
