Note Platform[®] Ambulatory Operations[™]

Getting the Most from Your Ambulatory EHR Data

Ambulatory Operations helps you gain insight into your ambulatory operations and patient population by organizing data extracted from the EHR. Ambulatory Operations provides both meaningful summary-level information and the ability to quickly get to the underlying details so you can uncover opportunities and problems—and quickly respond.

Access to Standard Out-of-the-Box Measures

Ambulatory Operations comes with more than one hundred out-of-the-box measures that can be quickly implemented in your hospital.

These measures include:

- Total Billable Office Visits
- Established Patient Visits
- Home Service Visits
- Total Payments (\$K)
- Insurance Payments (\$K)
- % New Patient Visits
- % No Show Appts

- New Patient Visits
- Sick/Well Visits
- □ Total Charges DOE (\$K)
- Patient Payments (\$K)
- % AR 000 to 030 Days
- % Chronic Population
- □ Well/Sick Ratio

Ad Hoc Analytics

Ambulatory Operations allows you to immediately begin analyzing information without having to build your analytics environment from scratch. An initial configuration is typically ready for analysis and validation within days. Plus, you can extend a standard configuration to meet the specific needs of your organization using a highly automated approach that's designed to be driven by subject matter experts (as opposed to programmers).

Information is quickly available via dashboards, reports, and ad hoc analytics. Ambulatory Operations provides users access to Operations Volumes, Operations Ratios, Revenue Volumes, Revenue Ratios, Financial Volumes, Financial Ratios, and other measures through Diver's analytical dashboards.

Users can view metrics and then click on any number or graphic to get to the underlying detail. Users instantly answer questions and gain insight into opportunities for improvement.
