

Influenza-like-illness intelligence

Get ahead of the curve to better protect your communities

The ever-changing nature of ILIs paired with high transmissibility causes significant healthcare, business, and societal disruption. Prepare for next season and beyond with tested, continuous influenza forecasts and global drivers of seasonal ILI burden.

Plan for the season ahead.

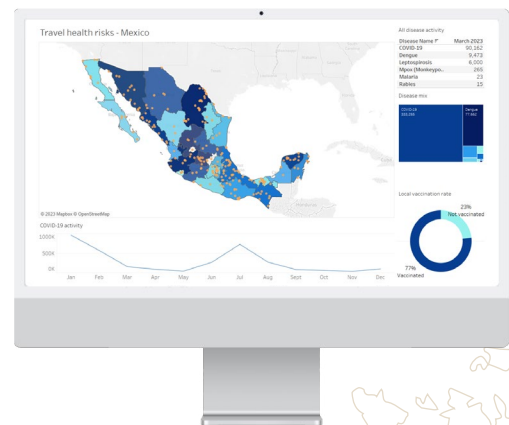

Pinpoint who, when, and where illness will strike with advanced warning of influenza season start and drivers of disease burden.

Pivot as new trends emerge.

Remain ahead of the curve with rolling activity forecasts & expert-written reports on the trends you cannot miss.

Engage communities and stakeholders.

Inform your campaigns with the most recent, compelling, and actionable data for your specific audience.

Influenza, COVID-19, and more

- Season start date & rolling seasonal influenza forecasts
- Multi-year historical subnational disease activity records
- Bi-weekly ILI Series reports that cover topics related to influenza, RSV, emerging COVID-19 variants, and more
- Rich library of environmental and demographic drivers of disease burden, such as vaccine hesitancy rates and social contacts

Combining clinical, epidemiology, and data science expertise to be the leaders in infectious disease intelligence

Critical disease event surveillance

Never be surprised again with the world's fastest and most comprehensive outbreak intelligence platform

Enhanced risk analysis toolkit

Go deeper on the drivers of disease spread, burden, and impact to make high-stakes decisions with confidence

Predictive intelligence

Prepare for next season and beyond with credible and tested continuous forecasts of respiratory and mosquito-borne illnesses

Protecting the lives of over 393 million global citizens
