# UKG

Analytics

Empowering people managers to turn insight into action — **in seconds**

UKG Dimensions™ Analytics delivers insights instantly to your frontline and operational people managers so they can confidently make impactful labor decisions backed by data. Easily identify, manage, and optimize opportunities for labor cost savings and productivity, with KPIs, metrics, and thresholds created to help you stay on track with your business goals in real time.

Personalized business indicators

KPIs, metrics, and thresholds help your people managers align to business goals in real time so they can make impactful labor decisions confidently, minimizing labor costs and maximizing productivity.

Instant insight

With Analytics, you can truly manage in the moment thanks to real-time data. Simple, easy-to-read visualizations help people managers understand what actions they need to take to course-correct and avert potential issues before they happen — all at a glance.

One platform, one experience

All of the precalculated data is delivered right in Dimensions, bringing a user-friendly and consistent data delivery experience for your frontline and operational people managers.
